EDUCATION

Dr B R Ambedkar National Institute of Technology Jalandhar
B.Tech in Computer Science and Engineering

2023 – June 2027
SGPA: 9.10 | CGPA: 8.20

EXPERIENCE

Unified Mentor Pvt. Ltd.

June 2026 – July 2026

Full Stack Web Development Intern

- Coded and deployed a full-stack Donation & Reuse Platform (React.js, Node.js, Express.js, MongoDB) supporting 5+ item categories across donor, browser, and requester workflows.
- Designed responsive user interfaces and 15+ RESTful API endpoints, integrating frontend and backend to power reliable, efficient data management across 3 user roles.
- Implemented secure authentication and CRUD operations, following Git/GitHub version control and clean, modular, well-documented coding practices across 50+ commits to deliver a production-ready application.

PROJECTS

FeedbackIQ | React.js, Node.js, Express.js, PostgreSQL, Prisma, Gemini API, LangChain

[GitHub](#) — [Live](#)

- Created a full-stack SaaS platform with custom front-end and back-end services for organizations to create shareable feedback forms and manage campaigns, using JWT authentication and a 3-tier role-based access control system.
- Architected an AI-powered analytics backend using Gemini for sentiment analysis and feedback categorization across 5+ categories, powering dashboards with 4+ visualization types.
- Integrated a RAG system (LangChain + Qdrant) and third-party Gemini API enabling natural-language querying of customer feedback with context-aware AI-generated responses.

NoteHub | React.js, Node.js, MongoDB

[GitHub](#) — [Live](#)

- Built a MERN stack web application with a responsive interface enabling users to upload and access notes organized across 10+ topic categories.
- Implemented user authentication and authorization to manage user-specific uploads and interactions.
- Added cross-user note viewing and a 5-star rating system, improving content quality and user engagement.

Legal RAG Assistant | FastAPI, React.js, LangChain, ChromaDB

[GitHub](#) — [Live](#)

- Designed a production-inspired Legal Retrieval-Augmented Generation (RAG) system using Hybrid Retrieval (ChromaDB + BM25) to answer questions across 3+ categories of legal documents.
- Devised Cross-Encoder reranking, a Citation Guard, and Gemini 2.5 Flash generation to deliver context-aware, citation-supported responses while reducing hallucinations.
- Developed an end-to-end pipeline covering PDF ingestion, semantic indexing, 10+ REST API endpoints, a React chat interface, and an evaluation pipeline benchmarked on 150 curated Q&A pairs.

SKILLS

Languages: JavaScript, Python, C++, HTML, CSS

Frameworks & Libraries: Node.js, Express.js, React.js, FastAPI, LangChain, C++ STL

Databases: PostgreSQL, MySQL, MongoDB

Tools & Technologies: REST APIs, JWT Authentication, Git/GitHub, Prisma, ChromaDB, Qdrant, Gemini API, Visual Studio Code

Coursework: Data Structures and Algorithms, Object-Oriented Programming, DBMS, Operating Systems

Soft Skills: Self-learning, Presentation

ACHIEVEMENTS

- Solved 1200+ problems on LeetCode with strong command of data structures and algorithms — Max Rating: 1949 (Knight).
- Solved 400+ problems on Codeforces — Max Rating: 1407 (Specialist).
- Grew a community of 2000+ followers on LinkedIn, engaging a technical audience on software development.
